

Working with key stakeholders- the government, local bodies, partner NGOs

Analysis and sharing of the quarantine data, App based reporting of Essential Health Services initiated across the state.

Provided continuous support to state and district units of National Health Mission and Department of health on coordination, planning and monitoring of COVID 19 response in all districts of Jharkhand

Support online training of NHM Cadre on Covid 19 using Video Conferencing across all the districts of Jharkhand

Support NHM in Data digitisation and sharing of data related to training and tracking of suspected COVID 19 persons and follow up. Data from ASHAs of all the villages is being compiled, analysed and then being provided to NHM Jharkhand. App based Essential Health Services Reporting, Social Vulnerability Mapping and Geospatial Applications

New development in the existing PLA App to enable App based reporting of Essential Health Services ensuring on time surveillance on the non covid health indicators.

Providing constant support and working together with the local and the national government – National Health Mission, NITI Ayog, district administrations, and civil society organizations to undertake evidence based action.
